# ABOUT IITE

The Indian Institute of Teacher Education is the institution with the difference as it is dedicated to the noble cause of education. IITE caters to the need for education, research, training, extension, and special education. The Government of Gujarat has mandated the institution to be the institution for developing school educators, teacher educators, and faculties of allied fields. Hon'ble Prime Minister and then Chief Minister of Gujarat, Shri Narendrabhai Modi has extended the scope of widening the horizons of teacher education because there is a dearth of teachers worldwide. He aspired to establish an institution dedicated to nurturing high-caliber educators and preparing them for national and global opportunities.

## ABOUT CENTRE OF RESEARCH

The Centre of Research (CoR) stands as one of the backbones of the Indian Institute of Teacher Education (IITE) and is dedicated to nurturing young and aspiring minds, encouraging them to delve into the realm of research within the field of education, with a specific emphasis on teacher education. To facilitate and propagate research in the sphere of education, particularly in the context of teacher training, there is a provision of establishing a Centre of Research as per the IITE Act, 2010 under section 6 (4). This Centre is comprised of five Research Councils, each concentrating on specific focal points of research. The foundational focus of the Centre of Research at IITE revolves around key research areas, including:

- ▶ **Exploring the Evolving Roles of Modern Educators:** This entails investigating the changing roles and responsibilities of contemporary teachers.
- ▶ **Mastering the Art and Science of Nurturing Gifted Students:** Delving into effective methods for nurturing and developing gifted children.
- ▶ **Understanding the Art and Science of Caring for the Vulnerable:** Addressing the unique challenges in caring for individuals who face psychological and physical challenges.
- ▶ **Exploring Special Issues in Childhood, Adolescence, and Youth:** Focusing on the distinctive challenges and needs of these critical developmental stages.
- ▶ **Examining the Philosophy and Psychology of Education within the Context of Indian Pedagogy and Contemporary Developments:** Delving into the philosophical and psychological underpinnings of education in the context of Indian pedagogy and modern developments.

# ABOUT CONFERENCE

The Conference aims to focus on the dynamic and interrelated themes of renewing the Indian Knowledge System and the globalisation of higher education. In today's globalised world, preserving and promoting ancient Indian Knowledge System through modern educational approaches is crucial. This seminar will explore how the Indian Knowledge System, with their extensive history of science, philosophy, and culture, might be regenerated and incorporated into modern academic structures.

A primary emphasis will be on reconciling the Indian Knowledge System with the globalisation of education. As global institutions embrace more inclusive educational methodologies, there is an increasing possibility to incorporate the insights of Indian traditions into multinational curricula. The event will explore the advantages of such integration for both Indian and global academic communities, promoting cross-cultural collaboration and information exchange.

The Conference will also examine the role of policy and governance in enabling this integration. Educational policymakers and governance frameworks significantly influence the future of higher education. By harmonising policies with national heritage and global trends, India may establish a framework that fosters academic success while guarding its rich intellectual traditions.

The Conference will explore quality assurance and accreditation framework. Effective quality assurance methods are essential for Indian institutions to align with foreign standards while maintaining the integrity of indigenous knowledge. This will assist institutions in achieving worldwide recognition and augmenting their competitiveness internationally.

The Conference aims to convene educators, policymakers, and researchers to explore, share, and collaborate on ways for revitalising the Indian Knowledge System and influencing the future of global higher education.
